

Roman Paver

Timeless and Versatile

Roman is one of Barkman's most popular and multifaceted pavers. Roman's thickness, as well as its wide range of sizes and colors, make it suitable for nearly any project including backyard patios, driveways, and walkways. Unlike many other pavers, Roman is tumbled, giving it a well-worn, weathered appearance that will never go out of style.

INSTALLATION NOTES

Barkman recommends the use of polymeric sand for commercial applications. A plate compactor should be used over the entire surface following installation. Roman pavers are rectangular and come in four sizes on separate pallets. They can be installed using one size only in a running bond or herringbone pattern, or they

can be installed by mixing the sizes to create a random pattern. When installing this product, make sure to include a 2-5mm gap between each unit. This will provide enough room for the jointing sand and make installation easier. For more in depth installation guides for specific products, visit BarkmanConcrete.com.
