

Arborwood Slab

A Dry Cast Slab with a Wet Cast Look

Arborwood recreates the look of Barkman's popular Bridgewood wet cast slab using the dry cast manufacturing process. The result is a more economical, wood textured slab modelled after rough wood planks.

Unlike traditional wood surfaces, Arborwood will never rot or warp and is easier to care for over time. Arborwood is ideal for residential applications like pool decks, paths and patios.

SIZES (L X W X H)

800 x 200 x 60 mm
31.5 x 7.87 x 2.36 in

COLOURS

Kodiak Brown

Timber Wolf

PATTERNS

1/2 Offset

Herringbone

INSTALLATION NOTES

Barkman recommends the use of polymeric sand. The use of a Paver Saver Mat between the paver surface and plate compactor is recommended. The compactor should be used at half speed. When installing this product, make sure to include a

2-5mm gap between each unit. This will provide enough room for the jointing sand and make installation easier. For more in depth installation guides for specific products, visit BarkmanConcrete.com.
