

Holland Paver

Simple European Style

Holland's simple style has long made it a favorite among home owners and municipalities alike. Right angles and straight lines add structure to any installation while adding a level of sophistication to residential and commercial settings. Holland is available in 60 mm and 80 mm thicknesses.

For scenarios where managing stone water runoff is a priority Holland is also available as a permeable paver as part of our Eco line.

INSTALLATION NOTES

Barkman recommends the use of polymeric sand for commercial applications. A plate compactor should be used over the entire surface following installation. Holland pavers can be installed in a running bond or herringbone pattern with border options that can be combined with other pavers. The patterns listed below can also be used on our 8CM Holland paver.

To calculate soldier course, multiply lineal footage by 0.7; this will indicate the square footage of Holland required. To calculate sailor course, multiply lineal footage by 0.35, this will indicate the square footage of Holland required. For more in depth installation guides for specific products, visit BarkmanConcrete.com.
